SCIENTIFIC EVALUATION PROCESS is developed according to the principle *double blind peer review*, by university teaching staff and scientific researchers with expertise in the field of the article. The author's identity is not known by evaluators and the name of the evaluators is not made known to authors.

Authors are informed of the conclusions of the evaluation report, which represent the argument for accepting/rejecting an article.

Consequently to the evaluation, there are three possibilities:

- a) *the article is accepted for publication as such or with minor changes;*
- b) *the article may be published if the author makes recommended improvements (of content or of linguistic nature);*
- c) *the article is rejected.*

Previous to scientific evaluation, articles are subject to an *antiplagiarism analysis*.
